## YOU CAN PREVENT

- Headaches
- Sore Throat
- Fever
- Disorientation
- Coughing
- Vomiting
- Black Snot

# ATTENTION WILDLAND FIREFIGHTERS

## Wildland Firefighters Need Lung Protection.

In the field they are exposed to numerous toxic gases including: Hydrogen Cyanide, Acrolein, Hydrogen Chloride, Nitric Oxide, Nitrogen Dioxide as well as deadly particulate matter and Carbon Monoxide. Xcaper smoke filters protect Wildland Firefighters from all of these deadly agents. Not only do the harmful effects of these toxic agents affect a Firefighter's performance in the field, they build up over time and eventually may lead to diminished lung capacity and even death.

When combined with either the Whiffs Brush Pro mask or Manta X bandana, lightweight Xcaper Smoke Filters enable Wildland Firefighters to work longer and fight fires more effectively and efficiently while protecting their lungs and securing their futures.

Join Wildland Firefighters all over the world in protecting your lungs. Use the Xcaper Smoke Filters with patented WHIFFS technology. WHIFFS moist filtration technology has been proven effective in both laboratory tests and in the field to eliminate the toxic gases and particulates that damage Firefighter's lungs and inhibit their ability to perform their job.
